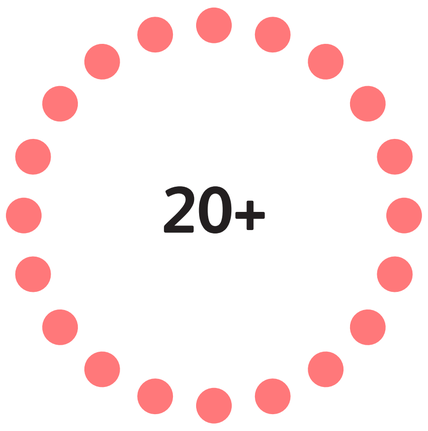
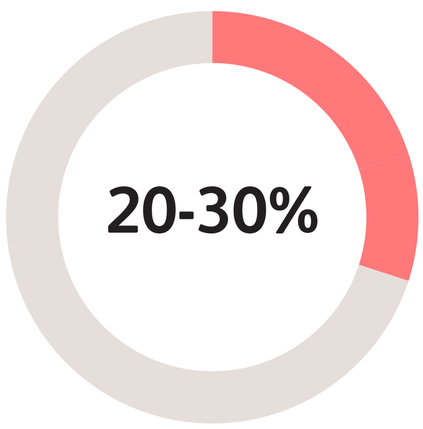
SAP transformation applied intelligently with BeMind by BearingPoint

Full-stack AI precision
meets human expertise for
faster, higher-quality results.

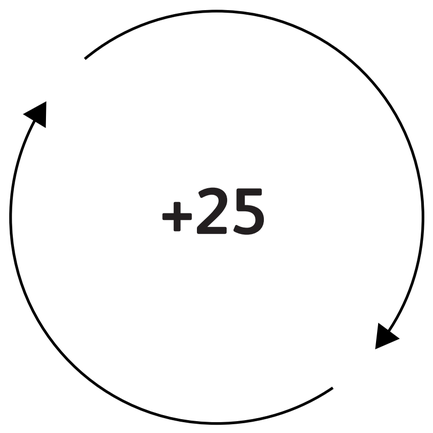
A proven AI platform transforming SAP delivery



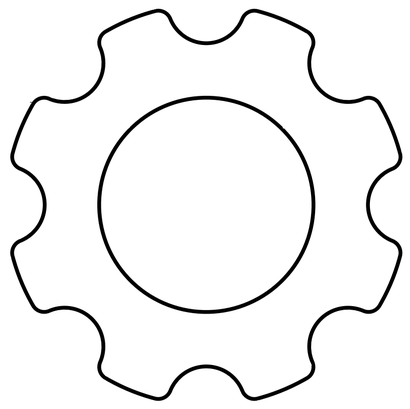
Tested in over 20 real-world transformations



Achieving productivity increases
of between 20-30%

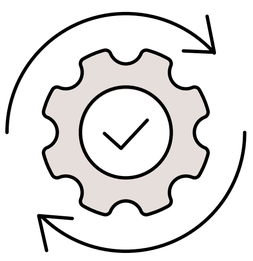


Supporting more than 25 use cases



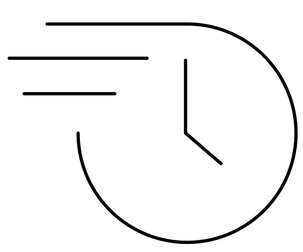
Customer-specific engineering
by advanced frameworks for
domain-specific automatization

Game-changing improvements in effort, time, and quality



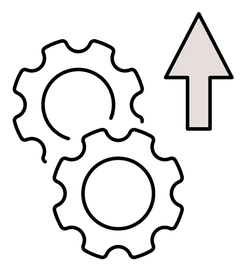
Effort Reduction

- Automation of documentation, testing, and coding
- Days turn into minutes
- Freeing teams to focus on validation, innovation, and higher-value analysis



Time Compression

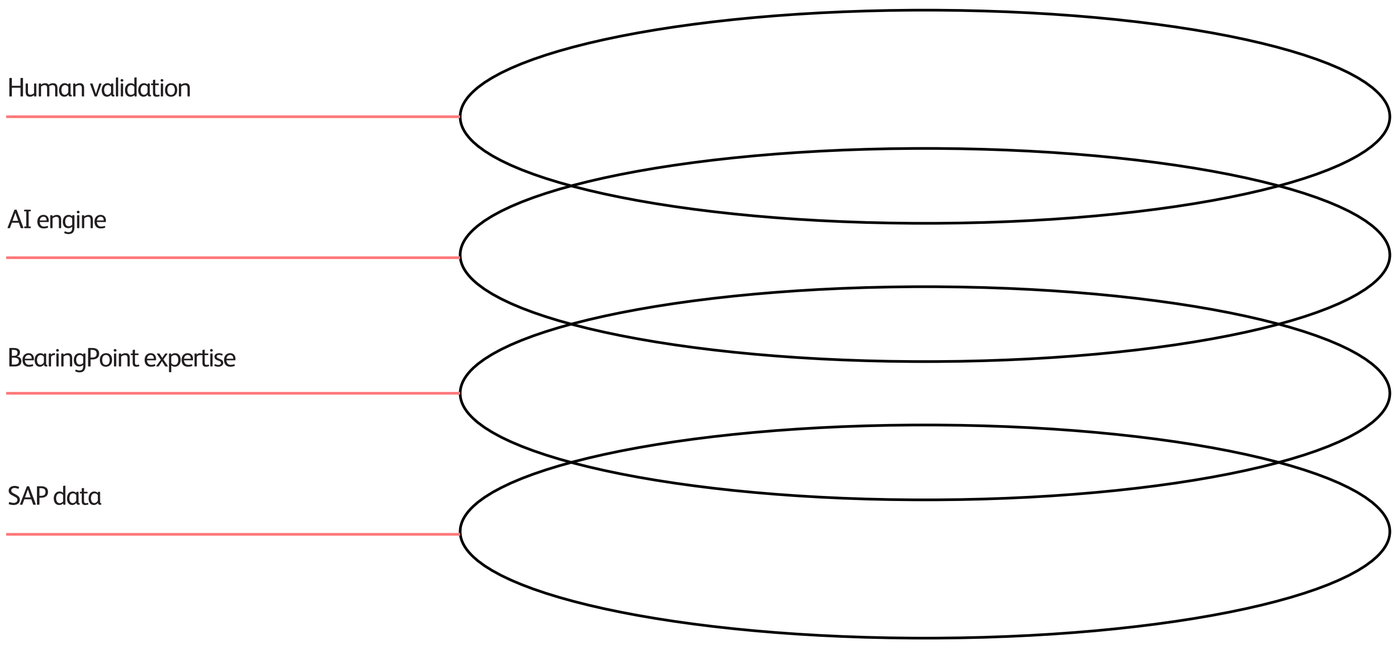
- 20–30% shorter project cycles
- Faster time-to-value
- Reducing risks associated with prolonged transformations



Quality Improvement

- Reviews code, cross-checks functional specifications
- Ensures that documentation aligns with client-specific standards
- Proactive quality & maintenance by issue detection and improved reliability across every stage of the project

Built for confidence and control



- Multi-layered architecture
- SAP-specific training
- Operates in a secure, auditable environment

Next-generation consulting is here

- Embedded in SAP projects globally
- Measured outcomes, replicated success
- Supports ongoing application management
- Risk-free, transparent rollout

“BeMind by BearingPoint is not just technology – it’s a new way of consulting.”
