

# Finance Strategy & Excellence

## Client Business Challenge

- The operative business needs better and faster decision, planning and forecasting support from Finance
- At the same time cost and regulatory pressures continue to apply even more strongly
- To align opportunities and demands, functional strategies are created which define the roadmap for Finance innovation and Finance transformation
- The digital transformation accelerates the shift from transactional to value driven services within the Shared Service Organizations.

## BearingPoint Contribution

- We help clients determine their Finance maturity in the dimensions of strategy, processes, organization, people and technology
- BearingPoint adds value by analyzing and improving your operating model with a meaningful structured approach, including innovative digital tools and optimized end-to-end processes.
- BearingPoint supports clients in creating Finance Strategies

## Client Business Outcomes

- Finance Strategy & Excellence including vision & mission statements, strategic thrusts and KPIs for technology, organization and people dimension and digitalization of Finance Processes
- Benchmark of the Total Cost of Finance and identification of efficiency and cost improvement potentials
- Agile advanced analytics mission in finance and procurement yielded six pilot projects with positive ROI
- Usage of our holistic self-assessment to measure the current level of maturity of the Shared Service Organizations & overall Finance function.
