

# SAP S/4 Transformation Framework

## Client Business Challenge

- Need for a smart transition approach that keeps both implementation time and effort on a low level, whilst reducing transformation risks to a minimum
- Companies are often swamped by the high level of complexity that goes along with large-scale S/4HANA transformation initiatives
- Ingenious tools as well as deep technical, methodical and industrial expertise is required to effectively drive a seamless transition into SAP S/4HANA

## BearingPoint Contribution

- Value driven S/4 Transformation approach by early identification of benefits for processes, systems and organizations.
- A large variety of own tools, templates and approaches – all combined in one system – allows smooth and profitable usage in any S/4 project
- For either incremental, agile or any kind of hybrid approaches our tool-set provides fast results and quick-wins to speed-up implementation

## Client Business Outcomes

- Smooth, cost-effective and rapid transition to gain benefits from SAP S/4HANA
- Risk reduction by quick implementation cycle times, early learnings and embedded feedback routines
- Identification of valuable and measurable low-hanging fruits during early stages of the project allow rapid pay-backs right from the start.
- Precocious understanding and establishment of new procedures, systems and organizational setup
- Achieving convincing benefits such as early look & feel of FIORI app solutions, S/4 simulation game
