

SWARM

Client Business Challenge

- Partly collected information, from multiple sources, many insights but both ineffectively and inefficiently captured
- Companies face difficulties in gathering unstructured human data, lacking intelligent prefill and automation degrees
- There is a strong need for having a seamless as well as fluent integration with companies' IT enterprise applications

BearingPoint Contribution

- Fully customized and automated solution for gathering and leveraging human data
- Improved data quality by intelligent automations and advanced input types
- Higher data volume by consolidating insights from both internals and externals
- Adding collected data in existing core applications without changing the client's process

Client Business Outcomes

- Seamless integration with different IT platforms (SAP, Microsoft, Salesforce and IFS) deriving collective intelligence
- Fully customizable templates for a wide range of cross-industry use cases
- Providing high accuracy input types (adding pins on 2D and 3D plans, maps and images)
- Integrated forms for end to end business processes
