

# Sustainability

## Client Business Challenge

ACTING NOW on new regulations and policies to ensure financial investments! DON'T BE REACTIVE because consumers and employees are stronger than ever to shape your business operations

<b>#NEW responsibilities:</b> New regulations and policies such as EU Taxonomy and EU Circular Economy are shaping the business context	<b>#NEW purchasing elements:</b> Market and consumers are more sensitive towards sustainable products and business models
<b>#NEW must:</b> Investment decisions are largely made based on environmental risks and social impact	<b>#NEW war-for-talents:</b> Employees are striving for purpose and looking for sustainable and responsible employers

Being compliant is not enough anymore – companies need to seize opportunities and make their business future-proof!

## BearingPoint Contribution

BearingPoint's #NEW SUSTAINABILITY approach highlights five areas that drive your company's sustainability performance

## Client Business Outcomes

#NEW SUSTAINABILITY is circular – The BearingPoint approach helps you to gain pace and stay in the loop

We bring the tools to holistically assess the status quo of your sustainability performance and assist in closing potential regulatory gaps. Cooperatively, we develop measures to improve the sustainability level in line with your strategy to make you fit for the future.
